

testing::Test

```
classDiagram
    class testing__Test["testing::Test"]
    class SDFormatParserTest {
        # SDFormatParserI * sdformat_parser
    }
    SDFormatParserTest --|> testing__Test
```

The diagram illustrates an inheritance relationship. A light gray box at the top represents the 'testing::Test' class, with the name in the top section and two empty sections below. A dark gray box at the bottom represents the 'SDFormatParserTest' class, with the name in the top section, a private member '# SDFormatParserI * sdformat_parser' in the middle section, and an empty section at the bottom. A blue arrow points from the top of the 'SDFormatParserTest' box to the bottom of the 'testing::Test' box, indicating that 'SDFormatParserTest' inherits from 'testing::Test'.

SDFormatParserTest

SDFormatParserI * sdformat
_parser
