

testing::Test

```
classDiagram
    class testing__Test["testing::Test"]
    class SDFormatParserTest
    SDFormatParserTest --|> testing__Test
```

The diagram illustrates an inheritance relationship. A light gray box at the top represents the 'testing::Test' class, with two empty rectangular slots below its name. A dark gray box at the bottom represents the 'SDFormatParserTest' class, which contains a C++ code snippet. A blue arrow points from the top of the 'SDFormatParserTest' box to the bottom of the 'testing::Test' box, indicating that 'SDFormatParserTest' inherits from 'testing::Test'.

SDFormatParserTest

```
# std::shared_ptr< SDFormat  
ParserI > sdformatParser
```
